The Personnel Management Process

Strategic Management of Human Capital in Education offers a comprehensive and strategic approach to address what has become labeled as "talent and human capital." Grounded in extensive research and examples of leading edge districts, this book shows how the entire human resource system in schools—from recruitment, to selection/placement, induction, professional development, performance management and evaluation, compensation, and career progression—can be reformed and restructured to boost teacher and principal effectiveness in ways that dramatically improve instructional practice and student learning. Strategic Management of Human Capital in Education guides educators towards putting more effective teachers, teacher leaders, and principals in the country's schools—especially in poverty-impacted urban and rural communities—equipping those teacher and principals with instructional and leadership expertise, and rewarding and retaining those who are successful in attaining these objectives. Drawing from cases, experiences, and deliberations from a national task force, this book outlines a comprehensive framework for how to transform current human resource management practices into authentic, strategic talent management systems in order to improve student achievement.

The public service has moved away from the old days of "personnel management" concerned mostly with processing "personal action" paperwork, to a system where public employees are managed as human capital to get the work of the government done more effectively and efficiently. This volume brings together the latest thinking on human resource management in the public service, presented by distinguished thought leaders in the field. While it focuses primarily on federal government policies and practices, the principles, conclusions, and recommendations translate readily to state and local government, and to the private sector as well.

Sound HRM practices matter—they are a sine qua non of effective governance in democratic government—equally so at the local, regional, state and national levels of government. The NASPAA (Network of Schools of Public Policy, Affairs, and Administration) accreditation standards demand critical competencies for public managers that are vital to human resource managers and supervisors at all levels. This second edition of Human Resource Management is designed specifically with these competencies in mind to: Introduce and explore the fundamental purposes of human resource management in the public service and consider the techniques used to accomplish these purposes Provide exercises to give students practice for their skills after being introduced to the theory, foundation, and practices of public and nonprofit sector HRM Facilitate instruction of the material by introducing important topics and issues with readings drawn from the professional literature Provide information and examples demonstrating the interrelatedness of many of the topics in public sector HRM and the trends shaping public and nonprofit management, especially diversity, ethics, and technology.
