Currently in a state of cultural transition, global society is moving from a literary society to digital one,
adoption of widespread use of advanced technologies such as the Internet and mobile devices. Digital media has an extraordinary impact on society's formative processes, forcing a pragmatic shift in their management and organization. Digital Literacy: Tools and Methodologies for Information Society strives to define a conceptual framework for understanding social changes produced by digital media and creates a framework within which digital literacy acts as a tool to assist younger generations to interact critically with digital media and their culture, providing scholars, educators, researchers, and practitioners a technological and sociological approach to this cutting-edge topic from an educational perspective.

Sara has always loved cats. She surrounds herself with pictures of cats, stuffed cats, even cat-headed slippers. But she’s never been allowed to have a real cat of her own. Her father has always told her no, for reasons he
won’t explain. So when a fluffy snowball of a kitten darts through their front door and into her life, Sara believes her dream might finally come true. But convincing her father to break his strict No Cats policy seems impossible. She has less than a week to persuade him that this kitten is exactly what their lonely, broken family of two needs to heal. Told in lyrical, spare verse, Serendipity & Me is a sparkling novel that elegantly handles the topic of loss for a middle grade audience.

The Second Edition of this essential handbook provides a comprehensive, updated overview of the science that informs best practices for the implementation of response to intervention (RTI) processes within Multi-Tiered Systems of Support (MTSS) to facilitate the academic success of all students. The volume includes insights from leading scholars and scientist-practitioners to provide a highly usable guide to the essentials of RTI assessment and identification as well as research-based interventions for improving students’ reading, writing, oral, and math skills. New and revised chapters explore crucial issues, define key concepts, identify topics warranting further study, and address real-world questions regarding implementation. Key topics include: Scientific foundations of RTI Psychometric measurement within RTI RTI and social behavior skills The role of consultation in RTI Monitoring response to supplemental services Using technology to facilitate RTI RTI and transition planning Lessons learned from RTI programs around the country The Second Edition of the Handbook of Response to Intervention is an essential resource for researchers, graduate students, and professionals/scientist-practitioners in child and school psychology, special and general education, social work and counseling, and educational policy and politics.

Colorectal Cancer Screening provides a complete overview of colorectal cancer screening, from epidemiology and molecular abnormalities, to the latest screening techniques such as stool DNA and FIT, Computerized Tomography (CT) Colonography, High Definition Colonoscopes and Narrow Band Imaging. As the text is devoted entirely to CRC screening, it features many facts, principles, guidelines and figures related to screening in an easy access format. This volume provides a complete guide to colorectal cancer screening which will be informative to the subspecialist as well as the primary care practitioner. It represents the only text that provides this up to date information about a subject that is continually changing. For the primary practitioner, information on the guidelines for screening as well as increasing patient participation is presented. For the subspecialist, information regarding the latest imaging techniques as well as flat adenomas and chromoendoscopy are covered. The section on the molecular changes in CRC will appeal to both groups. The text includes up to date information about colorectal screening that encompasses the entire
spectrum of the topic and features photographs of polyps as well as diagrams of the morphology of polyps as well as photographs of CT colonography images. Algorithms are presented for all the suggested guidelines. Chapters are devoted to patient participation in screening and risk factors as well as new imaging technology. This useful volume explains the rationale behind screening for CRC. In addition, it covers the different screening options as well as the performance characteristics, when available in the literature, for each test. This volume will be used by the sub specialists who perform screening tests as well as primary care practitioners who refer patients to be screened for colorectal cancer.
