Visual Basic SAP R/3 Programming

The #1 decision-maker's guide to SAP R/3--updated to reflect SAP's latest releases and initiatives. Using SAP R/3 as a backdrop, the book clearly demonstrates how common business process can be defined and then reengineered for maximum value. This edition explains SAP's latest R/3 releases and strategic initiatives in language that's easy to understand and apply. The Architecture, Framework, and Tools section provides up-to-date, detailed implementation help for IT professionals.

The first authoritative guide to the R/3 system, this book addresses the issues involved in implementing the R/3 system. It provides an overview of the architecture of R/3, the uses of R/3, application development with R/3, and concludes with a practical discussion on implementing the system. A guide to programming the newest version of ABAP/4 offers insider advice on using this language unique to SAP and includes a CD-Rom which contains sample SAP code and detailed techniques for coding. Original. (Intermediate). This volume reveals the inside story behind SAP, the German software giant. The author has interviewed the five SAP founders, numerous managers, company insiders and competitors to tell the story of how a programmer's sweatshop became a world market leader.

Many of the introductory SAP books currently on the market provide only a brief overview of ABAP. In ABAP/4: Programming the SAP R/3 System, Bernd Matzke builds on this information to look in depth at the programming language at the heart of the SAP R/3 system. This definitive guide to ABAP/4 aims to make the fundamentals of this evolving programming language accessible to anybody developing or maintaining an SAP R/3 system.

Starting with the basic principles, it explains the essential characteristics of ABAP/4 and the SAP programming concept. With this book you will learn how to: master the ABAP/4 commands in order to analyze existing standard applications and write new programs understand function modules to use program code from other applications use the Workbench organizer and On-line Debugger to relay applications and document changes create your own programs and construct your own test environments with an expansive set of examples designed to build up knowledge and programming skills The sample programs in the book were developed on a 3.0 system but can also run on other versions of the R/3 system. The accompanying CD-ROM contains sample programs used in this book for Version 3.0C together with a modified set of programs for systems running on Version 2.2E.

The ABAP/4 workbench presented here is built on the enterprise-wide data model of R/3 and contains all the tools needed for the effective development of large program systems in distributed teams. The book explains how to apply the development environment such that R/3 users and advisors can extend and adapt the system to their special needs. In particular, the text focuses on how to solve interface problems and the integration of desktop PCs into R/3. The source code for all examples is included on the accompanying diskette.

SAP is one of today's hottest client/server systems. Now, one of the top SAP consultants in the U.S. presents advice on moving to the SAP system and shows what companies have to gain from redesigning their business models to the SAP. Readers learn how to implement the individual modules of the SAP system, and more.

R/3 is a business system that has gained global prominence. However, the SAP R/3 has 237,000 function modules. Quite often programmers are unaware that a module exists which can be of help in their programs. This convenient resource is a collection of the most common ABAP modules, demonstrated within simple programs. These programs for easily searchable examples can be accessed from http://extras.springer.com/978-1-85233-775-9 The modules in this book are organised for quick reference. This concise reference contains: A full explanation of the layout of
reference entries; a brief introduction to SAP; coverage of conversion and date and time modules; file and directory modules; list, long texts, and number modules; useful integration modules for MSOffice and pop-up dialog box management. This book organises over 300 modules, many of which are undocumented in text, and arranges them for quick and easy reference, and explains when and where to use the most common SAP R/3 ABAP function modules. A world list of books in the English language. Provides an overview to the exam's topics, including a "Need to Know" list that identifies areas that must be understood in-depth. Includes exercises that can be performed, usually with a smallest BW server. Contains practice test questions that assess the readers' knowledge of the current exam topics. Serves as a complement to the classroom training provided by SAP. With this book, the thousands of new ABAP/4 programmers will learn the most advanced techniques required to develop custom applications using SAP's R/3 system and the Internet. Real-life examples are presented to support every topic. This book features the same highly readable yet deeply detailed format that made the authors' previous work, Introduction to ABAP/4 Programming for SAP R/3, so successful. The authors draw on their recent cutting edge work integrating R/3 and the Internet as well as their years of industry experience. The SAP R/3 System: An Introduction to ERP and Business Software Technology by R. diger Buck-Emden SAP's R/3 System sets the standard for the development of modern enterprise requirements applications n a multilingual, multinational client/server technology that meets all business requirements for scalability, portability, openness and high performance. This book provides essential background reading for anyone considering implementing any ERP package, and particularly the SAP R/3 System. The SAP R/3 System: An introduction to ERP technology describes the basic features of client/server computing and the technical structure of ERP systems, and then goes on to introduce the technical architecture of the R/3 system, application development with ABAP/4, R/3 business applications and implementation of an R/3 system within a business. This new edition of the best-selling introduction to the R/3 system has been comprehensively updated to reflect the changes and advances introduced with v4 of the system, and includes new coverage in areas such as Internet capability, SAP's Business Framework, Object Technology and R/3, and implementation and customization of an R/3 system. Features: Complete introduction to SAP R/3 technology Comprehensively updated to cover SAP R/3 v4 Based on wide experience from real R/3 implementations New to this edition: NEW chapter on SAP Business Framework NEW chapter on Object Technology and SAP R/3 NEW chapter on Business Processes on the Internet NEW chapter on R/3 Implementation and customization 0201596172B04062001This is a thorough revision of the previous edition and covers version 4.0 of SAP R/3. It considers the architecture, installation, applications and maintenance of SAP R/3, with a chapter on new trends. This book provides a review and an in-depth understanding of SAP/ERP systems application in business, and addresses issues relating to the successful implementation of these systems. Articles cover the history of SAP to the availability of a strategic implementation plan to ensure a successful and effective implementation approach. Programming with ABAP/4 - The world of sap Coding & Programming for beginner & professional This book has been written with the complete novice, SAP super-user, consultant and programmer who want to start or build the carrier in SAP ABAP in mind. Whether you are just starting to use SAP systems, an experienced consultant or something entirely different, if you have to use SAP in any way, then this book is for you! Explaining ABAP programming from scratch and explaining business flow of MM, SD, PP, FI/CO & HR Modules & Concepts with flow charts, tables & tcodes to guide Consultants, programmers gain confidence, get comfortable with and improve productivity using SAP ABAP. Beginners who are in their First & Second year of career with SAP ABAP will find this book beneficial the most. How the Chapters are arranged CHAPTER I - It will give you brief history on SAP, introduction to SAP R/3 architecture, system landscape, ABAP Programming structure & introduce you to the various applications with the SAP Business Suite. CHAPTER II - Helps YOU begin using SAP ABAP Programming or Introduction to ABAP Programming on a strong note. CHAPTERS III - Get introduce to Business flow of MM, SD, PP, FI/CO & HR Modules & Concepts with flow charts, Standard Tables & Transaction Codes. CHAPTER IV - Get introduce to complete ease with ABAP Dictionary or Data Dictionary (DDIC) Navigation and a strong footing to move forward confidently. CHAPTERS V - This chapter covers the different types of ABAP Reports & Events in ABAP Reports. Topics Covered Chapter I Introduction to SAP R/3 Architecture and History of SAP Chapter II ABAP Programming Language & Structure Chapter III Business Flows Chapter IV ABAP Dictionary or Data Dictionary (DDIC) Chapter V Introduction to ABAP/4, Inner Join, For All Entries, Modularization Technique, String Operation & Control Break Statement. Chapter VI SAP Tips & Tricks Chapter VII ABAP Reports (Classical, Interactive, ALV, LDB Report & SAP query) Chapter VIII Report Parameter Selections “SAP is an integrated ERP software catering to multiple industries, multiple geographies, spanning across almost all business functions or we can say SAP is an integration of all the business process at one
place'.--Gurunanjeshwar Togurage

DESCRIPTION The book has been written in such a way that the concepts are explained in detail, giving adequate emphasis on examples. To provide clarity on the programming examples, logic is properly explained and discussed by using comments in the program itself. The topics covered in this book include starting the software using snapshots of the same and writing programs. Simple to complex SAP/ABAP HANA examples are provided in detail, considering the requirement of IT consultants the basic idea of developing projects in it. The examples provided in this book are user-focused and are provided through sections, figures, and examples.

KEY FEATURES
Comprehensive coverage of SAP/ABAP HANA with emphasis on real-time case studies. Practical examples along with Screen personas, SAP Fiori cloud, OPEN SQL, Native SQL & ADBC, CDS support in SAP NW ABAP 7.4 SP5, SAP HANA Studio, performance enabler Rules & guidelines. Simple language, crystal clear approach, straightforward comprehensible presentation. Concepts are duly supported with examples. Topic coverage with the aim to fill the skill gap between industry and academia. SAP Business Suite powered by SAP HANA are helpful for developing projects for IT consultants.

The book is designed to begin with the very basics and moves forward to cover the topics necessary to unleash the power of SAP - from the way tasks are handled in SAP to how Reports are executed in your task; from getting a complete know-how of SAP Administrative Utilities and Background Job Scheduling to SAP R/3 Basis System; from ABAP Workbench to ABAP Programming with MM and SD Modules and much more. With each topic building upon others, you are quickly able to utilize the R/3 functionality in a meaningful and productive manner. All this, as the book zips through the material and doesn’t blather on or repeat points made earlier. A definitive informative guide that will help you make good on your company’s sizable investment - no doubt, every aspect is worth the price of the entire book. Following on the success of Developing SAP’s R/3 Applications with ABAP/4, SAP and Sybex have joined forces to deliver a full series of practical guides on the most pressing topics. Written by SAP authors with SAP technical endorsement, these books are perfect for IT managers, consultants, administrators, implementers, and many other computing professionals.

Written by two of the product’s developers, this book covers all basic ABAP/4 language features and provides an easy way to learn without attending an expensive six-month course. In three parts, this guide to building R/3 applications is ideal for software professionals, consultants, students, and IS managers and planners. Not just a description of the architecture, this book studies the complexities of setting up and running an R/3 System from the perspective of a System Administrator. It is filled with practical instructions and design guidance for setting up a smooth implementation. The CD-ROM includes a test engine. This text provides information on SAP implementation derived from a research study of 20 companies that have implemented R/3. Over 50 people were interviewed, including executives, project managers, change management specialists, consultants in the "Big 6", and SAP employees. A collection of action and implementation-oriented cases focused on improving the operations of a business unit. Focuses on the individual operating unit in both manufacturing and services.

Addresses the design, management and improvement of the fundamental building blocks of operations &-- operations processes. Looks at the systems used to coordinate processes, focusing on the use and management of information technology as part of such systems. For those in production and/or operations management.

Furnishes practical, effective advice for developers and administrators using the SAP business system and the Oracle database system (version Oracle8 or Oracle7) together, covering the SAPDBA and SAPGUI utilities and offering information on data file placement, initialization parameters, backup, recovery, parallel processing, and more. Original. (Intermediate) Many of the introductory SAP books currently on the market provide only a brief overview of ABAP. In ABAP/4 Programming the SAP/3 System, Bernd Matzke builds on this information to look in depth at the programming language at the heart of the SAP R/3 system. This new and fully updated edition of the definitive guide to ABAP/4 aims to make the fundamentals of this evolving programming language accessible to anybody developing or maintaining an SAP R/3 system. Starting with the basic principles, it explains the essential characteristics of ABAP/4 and the SAP programming concept. With this book you will learn how to: Master the ABAP/4 commands in order to analyze existing standard applications and write new programs Understand function modules to use program code from other applications Create your own programs and construct your own test environments with an expansive set of examples designed to build up knowledge and programming skills NEW! Covers new concepts affecting the development environment and program, in line with R/3 Release 4.6 NEW! Covers features of completely redesigned user interface NEW! Reference section covering ABAP commands in Release 4.6B NEW! CD-ROM containing source code of all examples plus SAP transport files with examples The sample programs in this book were developed on a 4.6B-system but can also run on other versions of the R/3 system. Written for Visual Basic application developers who need to integrate applications with
business data from SAP, this book closes the information vacuum between SAP and Microsoft at the present. Answering the huge pent-up demand for Microsoft/SAP integration, the book shows how to replace proprietary and clunky SAP programming tools with Visual Basic. This book is for the professional financial manager, accountant, or bookkeeper who needs to learn the basics of SAP R/3 FI quickly, without wading through a morass of technical jargon. Featuring a clear, functional outline, copious sample screens, and simple step-by-step instructions, Using SAP R/3 FI presents the most widely used FI functions in plain, argot-free English, following menu lines from the actual program. The book also provides details about using FI for international business, such as translating the chart of accounts, keeping accounts in foreign currency, entering transactions in foreign currency, and revaluing accounts and open items in different currencies. You'll also learn the highlights of integrating R/3 FI with SD (order entry, shipping, and invoicing) and MM (purchasing, receiving, and inventory control). This remarkably detailed manual shows you how to use R/3 FI for all your basic accounting functions, including * General ledger * Accounts receivable * Accounts payable * System administration * And much, much more. If you are responsible for the administration of an SAP R/3 system, or would like to know more about it, this book will show you how to exploit the potential of the R/3 system to maximum effect. SAP R/3 Administration provides a detailed explanation of the technological basis and the development environment of the R/3 system and practical guidance on performance tuning the R/3 system. This book provides detailed coverage of the organization and operation of the R/3 system and the transport system that monitors, coordinates and logs access to system data. It explains the fundamentals of ABAP/4, the programming language at the heart of the SAP R/3 system, and shows how to program simple reports and understand ABAP/4 programs. With this book you will learn how to: monitor and maintain a live R/3 syste understand different types of R/3 system, exchange objects between these systems and control modifications to the use use the CCMS (computer center management system) to observe R/3 operation and evaluate and avoid potential problems early on. The authors have drawn on their own considerable experience in customer support to provide this comprehensive, practical guide to the administration and performance tuning of the SAP R/3 system. While you do not have to have any prior knowledge of the R/3 system to read this book, it is assumed that you will have some previous experience of relational database management systems and SQL. An accompanying disk contains R/3 transport data for the examples featured in the book and is described in Appendix G. Often for the purpose of preparation candidates struggle to look for important topics and browse through some valuable concepts, they feel might be asked in an interview. Such a frantic search consumes a lot of time and energy, as it requires going through high volumes of ABAP technology. In order to solve this dilemma here is SAP ABAP/4 Interview Questions Book, which is well equipped to deal with such problems. "Artful Making" offers the first proven, research-based framework for engineering ingenuity and innovation. This book is the result of a multi-year collaboration between Harvard Business School professor Robert Austin and leading theatre director and playwright Lee Devin. Together, they demonstrate striking structural similarities between theatre artistry and production and today's business projects--and show how collaborative artists have mastered the art of delivering innovation "on cue," on immovable deadlines and budgets. These methods are neither mysterious nor flaky: they are rigorous, precise, and--with this book's help--absolutely learnable and reproducible. They rely on cheap and rapid iteration rather than on intensive up-front planning, and with the help of today's enabling technologies, they can be applied in virtually any environment with knowledge-based outputs. Moreover, they provide an overarching framework for leveraging the full benefits of today's leading techniques for promoting flexibility and innovation, from agile development to real options. For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network. This "Special Edition" is a complete guide to SAP, with a thorough overview of each module and how they work together. The book gives coverage of SAP's latest release of 4/3, version 3.1, with Internet capabilities for creating online commerce or Intranets. Speed through the most difficult implementation of R/3 version 4 by using this practical guide to ASAP. The CD-ROM contains a test engine for Certified Technical Consultant training.
