Water dowser. Conspiracies and myths captivate imaginations and promise mystery and magic. Whether it's about the moon landing hoax or a Frisbee-like Earth drifting through space, when held up to science and critical thinking, these ideas fall flat. In Weird Earth: Debunking Strange Ideas About Our Planet, Donald R. Prothero demystifies these conspiracies and offers answers to some of humanity's most outlandish questions. Applying his extensive scientific knowledge, Prothero corrects misinformation that con artists and quacks use to hoodwink others about geology—hollow earth, expanding earth, and bizarre earthquakes—and mystical and paranormal happenings—healing crystals, alien landings, and the gates of hell. By deconstructing wild claims such as prophecies of imminent natural disasters, Prothero provides a way for everyone to recognize dubious assertions. Prothero answers these claims with facts, offering historical and scientific context in a light-hearted manner that is accessible to everyone, no matter their background. With a careful layering of evidence in geology, archaeology, and biblical and historical records, Prothero's Weird Earth examines each conspiracy and myth and leaves no question unanswered.

Examines patents for items ranging from a genetically engineered mouse to escapable coffins, as well as patents for everyday items, and presents the inventor's specifications and patent drawings. Calling all dreamers, artists, and innovators! Here is your invitation to embrace wild, beautiful, crazy ideas. With hands-on exercises reminiscent of a sketchbook, each page holds delightful surprises, engaging stories, and imaginative activities to unleash your creativity and unique brilliance. Features a hardcover and lay-flat binding. From Lovecraft to Borges to Gaiman, a century of intrepid literary experimentation has created a corpus of dark and strange stories that transcend all known genre boundaries. Together these stories form The Weird, and its practitioners include some of the greatest names in twentieth and twenty-first century literature. Exotic and esoteric, The Weird plunges you into dark domains and brings you face to face with surreal monstrosities. You won't find any elves or wizards herebut you will find the biggest, boldest, and downright most peculiar stories from the last hundred years bound together in the biggest Weird collection ever assembled.

The Weird features 110 stories by an all-star cast, from literary legends to international bestsellers to Booker Prize winners: including William Gibson, George R. R. Martin, Stephen King, Angela Carter, Kelly Link, Frank Frazetta, China Mieville, Clive Barker, Haruki Murakami, M. R. James, Neil Gaiman, Nancy Kress, Ursula K. Le Guin, Harlan Ellison, and Michael Chabon. The Weird is the winner of the 2012 World Fantasy Award for Best Anthology At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. As new discoveries complicate the scientific picture of the universe, the evolving theories about the nature of space and time and the origins and fate of the universe threaten to become overwhelming. Enter David Seargent. Continuing the author's series of books popularizing strange astronomy facts and knowledge, Weird Universe explains the bizarre, complicated terrain of modern cosmology for lay readers. From exploring some of the strange consequences of the theories of special and general relativity, to probing time dilation and the twin and mother-and-baby "paradoxes" and the theory that the universe can be mathematically considered as a hologram, all of the latest findings and conjectures are clearly described in non-technical language. The development of quantum physics and the more recent developments of string and M-theory are looked at, in addition to several hypotheses that have not won wide acceptance from the scientific community, such as modified gravity. Enter the wonderfully weird world of these theories and gain a new appreciation for the latest findings in cosmological research. Considers. S. 1795 and companion H.R. 7300, to authorize AEC to require performance bonds for licensed nuclear waste disposal agents, and to increase quantities of uranium and plutonium which may be furnished to Euratom. S. 2816 and companion H.R. 11180, to extend AEC patent licensing authority, to extend indemnity coverage for reactors, and to authorize AEC to sell or lease property at Richland, Wash. Introduces the proven rules that a company can use to promote innovation, arguing that the corporate world should hire misfits and encourage them to defy the existing culture and actively consider ideas that appear ridiculous or impractical. Workplace performance expert Putzler offers 101 ways to make the workplace a more enjoyable and productive environment. In a lighthearted manner, he discusses how to change the tone and culture of a company with quick and often inexpensive ideas in order to improve employee morale, creative thinking, and work output. Other topics include attracting and retaining the best available talent, enhancing the company image, lowering stress, providing recognition and incentives, and implementing training and development strategies. Brian Hobble isn't much of a writer—he's more of a soccer player. (And sometimes he's not much of a soccer player either!) But one day he borrows a pink Easyflow pen from Nathan Lumsdyke, during his favorite author's school visit, and suddenly, he can't stop writing. Unfortunately for Brian, the pen only writes flowery, embarrassing love stories, even in his science test. Brian can't wait to give the weird pen back until he realizes Cassandra Wyman is a lot more interested in writing than she is in soccer. Be sure to look for Richard Tulloch's other book, Freaky Stuff!
