Power And Religion in Baroque Rome
Monumental study traces the history of mechanical principles chronologically from antiquity through the early 20th century. Contributions of ancient Greeks, Leonardo, Galileo, Kepler, Lagrange, others. 116 illustrations.

Korean Games with Notes on the Corresponding Games of China and Japan
Ivor Mantale brings 40 years experience to this book on collecting single-lens reflex cameras, which includes: descriptions and evaluations of the principal makes and models from their earliest forms in the late 19th century to modern versions in the 1980s; instructions on testing and checking for faults; pictures of classic cameras, lenses and equipment, from Adams to Zenit, Graflex to Pentax as well as information on repairers and dealers; and listings of collectors' clubs and groups.

Daughters of Alchemy
This book explores the interconnections and differentiations between artisanal workshops and alchemical laboratories and between the arts and alchemy from Antiquity to the eighteenth century. In particular, it scrutinizes epistemic exchanges between producers of the arts and alchemists. In the fifteenth and sixteenth
centuries the term laboratorium uniquely referred to workplaces in which ‘chemical’ operations were performed: smelting, combustion, distillation, dissolution and precipitation. Artisanal workshops equipped with furnaces and fire in which ‘chemical’ operations were performed were also known as laboratories. Transmutational alchemy (the transmutation of all base metals into more noble ones, especially gold) was only one aspect of alchemy in the early modern period. The practice of alchemy was also about the chemical production of things—medicines, porcelain, dyes and other products as well as precious metals and about the knowledge of how to produce them. This book uses examples such as the Uffizi to discuss how Renaissance courts established spaces where artisanal workshops and laboratories were brought together, thus facilitating the circulation of materials, people and knowledge between the worlds of craft (today’s decorative arts) and alchemy. Artisans became involved in alchemical pursuits beyond a shared material culture and some crafts relied on chemical expertise offered by scholars trained as alchemists. Above all, texts and books, products and symbols of scholarly culture played an increasingly important role in artisanal workshops. In these workplaces a sort of hybrid figure was at work. With one foot in artisanal and the other in scholarly culture this hybrid practitioner is impossible to categorize in the mutually exclusive categories of scholar and craftsman. By the seventeenth century the expertise of some glassmakers, silver and goldsmiths and producers of porcelain was just as based in the worlds of alchemical and bookish learning as it was grounded in hands-on work in the laboratory. This book suggests that this shift in workshop culture facilitated the epistemic exchanges between alchemists and producers of the decorative arts.

**King Khama, Emperor Joe, and the Great White Queen**

From an award-winning historian: “A new and convincing likeness of medieval England's most iconic king” (The Sunday Times). This biography by the bestselling author of The Time Traveler's Guide to Medieval England takes an insightful look at the life of Henry V, casting new light on a period in history often held up as legend. A great English hero, Henry V was lionized by Shakespeare and revered by his countrymen for his religious commitment, his sense of justice, and his military victories. Here, noted historian and biographer Ian Mortimer takes a look at the man behind the legend and offers a clear, historically accurate, and realistic representation of a ruler who was all too human—and digs up fascinating details about Henry V’s reign that have been lost to history, including the brutal strategies he adopted at the Battle of Agincourt.

**Flight Out of Time**

Nomads on Pilgrimage: Mongols on Wutaishan is a social history of the Mongols’ pilgrimages to one of the main Buddhist mountain of China in late imperial and Republican times (1800-1940).

**The New Grove Dictionary of Music and Musicians: Russian Federation, II to Scotland**

An introduction to the Canon EOS 7D camera examines the purpose and function of the camera’s basic controls and how to use them, accompanied by explanations of custom functions, choosing exposure settings, manipulating focus and color, and downloading pictures.

**Art Worlds**

**The Occult Mind**

The EOS Rebel series brings together everything photographers want in a 35mm camera--they're simply the most advanced SLRs in their class. To find out how best to use these masterpieces of form and function--Canon EOS Rebel T2, EOS Rebel K2, EOS Rebel Ti, plus their European counterparts--look into the Magic Lantern Guide. With loads of diagrams and user-friendly instructions, it covers every aspect of these fully automatic 35mm Autofocus SLRs: their 7-point High-Speed, Wide-Area Selectable AF with Advanced 35-zone Metering; Safety Shutter-Release Lock and Camera Shake Warning; and Advanced E-TTL II Autoflash and Enhanced Built-in Flash.

Here are techniques, tips, and shortcuts for taking fantastic pictures with vintage Pentax cameras--among the best ever produced. Even the original manuals didn't delve into the details so deeply. Get all the facts on speeds; apertures; focusing; depth of field; loading; flashbulbs; and camera maintenance. Then go through the individual series--the Spotmatics, the Pentax K, the M, and the LX--learning everything from the batteries they need to lenses and flashes, and a full assortment of accessories.
How the Wise Men Got to Chelm

Canon EOS Rebel T2

This study analyzes the ways in which a variety of cultural manifestations were the necessary preconditions for (religious) policy and power in the Rome of Urban VIII (1623-1644). Precisely their interaction created what we now call 'Baroque Culture'.

The Book of the Prophet Isaiah

How the Wise Men Got to Chelm is the first in-depth study of Chelm literature and its relationship to its literary precursors. When God created the world, so it is said, he sent out an angel with a bag of foolish souls with instructions to distribute them equally all over the world—one fool per town. But the angel's bag broke and all the souls spilled out onto the same spot. They built a settlement where they landed: the town is known as Chelm. The collected tales of these fools, or “wise men,” of Chelm constitute the best-known folktale tradition of the Jews of eastern Europe. This tradition includes a sprawling repertoire of stories about the alleged intellectual limitations of the members of this old and important Jewish community. Chelm did not make its debut in the role of the foolish shtetl par excellence until late in the nineteenth century. Since then, however, the town has led a double life—as a real city in eastern Poland and as an imaginary place onto which questions of Jewish identity, community, and history have been projected. By placing literary Chelm and its “foolish” antecedents in a broader historical context, it shows how they have functioned for over three hundred years as models of society, somewhere between utopia and dystopia. These imaginary foolish towns have enabled writers both to entertain and highlight a variety of societal problems, a function that literary Chelm continues to fulfill in Jewish literature to this day.

Canon EOS 50D Digital Field Guide

A History of Mechanics

The later medieval English church is invariably viewed through the lens of the Reformation that transformed it. But in this bold and provocative book historian George Bernard examines it on its own terms, revealing a church with vibrant faith and great energy, but also with weaknesses which reforming bishops worked to overcome. Bernard emphasises royal control over the church. He examines the challenges facing bishops and clergy, and assesses the depth of lay knowledge and understanding of the teachings of the church, highlighting the practice of pilgrimage. He reconsidered anti-clerical sentiment and the extent and significance of heresy. He shows that the Reformation was not inevitable: the late medieval church was much too full of vitality. But Bernard also argues that alongside that vitality, and often closely linked to it, were vulnerabilities that made the break with Rome and the dissolution of the monasteries possible. The result is a thought-provoking study of a church and society in transformation.

This is a beautifully written, heartfelt look at the effects of breast cancer and the loss of a loved one to the disease. It’s the summer of 1987, and Mira is beginning her first year at university. She has a radical new haircut, and an all-black wardrobe: she should be having the time of her life. But, it’s hard for her to get excited about anything when she’s being smothered by her crazy Italian family, enrolled in a course she’s not interested in, and expecting nuclear warfare at any moment. Even a new best friend and the magnetic boy from art class can’t wipe away the image of a looming mushroom cloud—her mother has breast cancer. Mira’s world is about to explode, but it’s not the skies she should be checking.

Leonardo Da Vinci

Canon’s got an impressive, hot new Pro-level digital SLR camera, and photographers will want to understand
how to use every one of its up-to-the-minute functions. With Magic Lantern, they will. It goes well beyond the camera’s instruction manual, and explains how to handle all the decisive moments in shooting the action. Find out how to take advantage of the camera’s 8.2 megapixel resolution from its low-noise CMOS sensor. Learn how to set digital shooting speed records with the Mark II’s 8.5-frames-per-second drive and high-speed JPEG image buffer. (It can buffer 69 megapixels per second.) You’ll understand all the camera’s ins and outs, meet all the challenges of professional shooting, and get amazing results.

Meredith Ray shows that women were at the vanguard of empirical culture during the Scientific Revolution. They experimented with medicine and alchemy at home and in court, debated cosmological discoveries in salons and academies, and in their writings used their knowledge of natural philosophy to argue for women’s intellectual equality to men.

**Canon EOS 7D**

Leonardo is the greatest, most multi-faceted and most mysterious of all Renaissance artists, but extraordinarily, considering his enormous reputation, this is the first full-length biography in English for several decades. Prize-winning author Charles Nicholl has immersed himself for five years in all the manuscripts, paintings and artefacts to produce an ‘intimate portrait’ of Leonardo. He uses these contemporary materials - his notebooks and sketchbooks, eye witnesses and early biographies, etc - as a way into the mental tone and physical texture of his life and has made myriad small discoveries about him and his work and his circle of associates. Among much else, the book identifies what Nicholl argues is an unknown portrait of the artist hanging in a church near Lodi in northern Italy. It also contains new material on his eccentric assistant Tomasso Masini, on his homosexual affairs in Florence, and on his curious relationship with a female model and/or prostitute from Cremona. A masterpiece of modern biography.

**The Time Traveler's Guide to Medieval England**

"Given the historical orientation of philosophy, is it unreasonable to suggest a wider cast of the net into the deep waters of magic? By encountering magical thought as theory, we come to a new understanding of a thought that looks back at us from a funhouse mirror.”—The Occult Mind Divination, like many critical modes, involves reading signs, and magic, more generally, can be seen as a kind of criticism that takes the universe—seen and unseen, known and unknowable—as its text. In The Occult Mind, Christopher I. Lehrich explores the history of magic in Western thought, suggesting a bold new understanding of the claims made about the power of various belief systems. In closely interlinked essays on such disparate topics as ley lines, the Tarot, the Corpus Hermeticum, writing and ritual in magical practice, and early attempts to decipher Egyptian hieroglyphics, Lehrich treats magic and its parts as an intellectual object that requires interpretive zeal on the part of readers/observers. Drawing illuminating parallels between the practice of magic and more recent interpretive systems—structuralism, deconstruction, semiotics—Lehrich deftly suggests that the specter of magic haunts all such attempts to grasp the character of knowledge. Offering a radical new approach to the nature and value of occult thought, Lehrich's brilliantly conceived and executed book posits magic as a mode of theory that is intrinsically subversive of normative conceptions of reason and truth. In elucidating the deep parallels between occult thought and academic discourse, Lehrich demonstrates that sixteenth-century occult philosophy often touched on issues that have become central to philosophical discourse only in the past fifty years.

**The Geography of the Imagination**

During the seventeenth century, Holland created the world's most dynamic colonial empire, outcompeting the British and capturing Spanish and Portuguese colonies. Yet, in the Sino-Dutch War--Europe's first war with China--the Dutch met their match in a colorful Chinese warlord named Koxinga. Part samurai, part pirate, he led his generals to victory over the Dutch and captured one of their largest and richest colonies--Taiwan. How did he do it? Examining the strengths and weaknesses of European and Chinese military techniques during the period, Lost Colony provides a balanced new perspective on long-held assumptions about Western power, Chinese might, and the nature of war. It has traditionally been asserted that Europeans of the era possessed more advanced science, technology, and political structures than their Eastern counterparts, but historians have recently contested this view, arguing that many parts of Asia developed on pace with Europe until 1800. While Lost Colony shows that the Dutch did indeed possess a technological edge thanks to the Renaissance fort and the broadside sailing ship, that edge was neutralized by the formidable Chinese military leadership. Thanks to a rich heritage of ancient war wisdom, Koxinga and his generals outflied the Dutch at every turn. Exploring a period when the military balance between Europe and China was closer than at any other point in modern history, Lost Colony reassesses an important chapter in world history and offers valuable and surprising lessons for contemporary times.

**The Pictorial Key To The Tarot Illustrated**
Laboratories of Art

This book contains all of Leonardo Da Vinci’s drawings on the heart and its physiology, accompanied by re-translations of all of the associated notes. All Leonardo's drawings have been interpreted in the light of modern knowledge by a practicing cardiac clinician and anatomist. The veracity of his work is proven against contemporary dissections of cardiac structure and comparison of his illustrations with contemporary images generated by Magnetic Resonance scanners and high definition ultrasound will astound the reader. Perhaps the most interesting element is the re-dissection of the Ox heart set against Leonardo’s own drawings. His place in the greater scheme of anatomical development will be put into context with his ideas of man’s place in the microcosm/macrocosm continuum.

Canon 50D

Now that you’ve bought the amazing Canon 50D, you need a book that goes beyond a tour of the camera’s features to show you exactly how to use the 50D to take great pictures. With Canon 50D: From Snapshots to Great Shots, you get the perfect blend of photography instruction and camera reference that will take your images to the next level! Beautifully illustrated with large, vibrant photos, this book teaches you how to take control of your photography to get the image you want every time you pick up the camera. Follow along with your friendly and knowledgeable guide, photographer and author Jeff Revell, and you will: • Learn the top ten things you need to know about shooting with the 50D • Use the 50D’s automatic modes to get better shots right away • Move on to the Creative zone, where you have full control over the look and feel of your images • Master the photographic basics of composition, focus, depth of field, and much more • Learn all the best tricks and techniques for getting great action shots, landscapes, and portraits • Find out how to get great shots in low light • Fully grasp all the concepts and techniques as you go, with assignments at the end of every chapter With Canon 50D: From Snapshots to Great Shots, you’ll learn not only what makes a great shot work—you’ll learn how to get that shot using your 50D. And once you’ve got the shot, show it off! Join the book’s Flickr group, share your photos, and discuss how you use your 50D to get great shots at flickr.com/groups/canon_50dfromsnapshotstogreatshots.

Lost Colony

A complete introduction to shooting, processing and rendering time-lapse movies with a DSLR camera. Written for new and intermediate DSLR users and time-lapse photographers this guide offers a detailed and easy to follow photo rich workflow to capture and produce great time-lapse movies.

The Heart of Leonardo

The Pictorial Key to the Tarot is A. E. Waite's guide to divinatory tarot, published in England in 1911 in conjunction with the Rider-Waite-Smith deck. Waite was very concerned with the accuracy of the symbols he used for his deck, and he did much research into the traditions, interpretations, andHistorybehind the cards.

Charlotte Lowrie’s indispensable guide to taking the best possible pictures with the Canon EOS 50D! Go well beyond the basics with this essential guide to getting great shots with the Canon EOS 50D camera. Professional photographer and bestselling author Charlotte Lowrie packs this portable guide with over 290 pages of beautiful full-color photos, proven techniques, and no-fail formulas for tapping all the features this exciting new high-resolution DSLR camera offers. Get to know your Canon EOS 50D, learn all the tricks, and then take this handy portable guide with you in the field for quick and easy reference. Master your Canon EOS 50D camera with expert guidance from Seattle-area professional photographer and popular author, Charlotte Lowrie Find pages of step-by-step techniques and professional tips that will help you understand all the functions, menus, and dials on your camera Explore topics that many competitive digital SLR books just touch on, including step-by-step instruction on exposure and composition Learn professional composition and lighting tricks Examine full-color examples of breathtaking ways to capture stills, portraits, and action shots Canon EOS 50D Digital Field Guide is the latest in the bestselling Digital Field Guide series that has taught thousands of photographers and beginners how to get the most out of their digital cameras.

Time-lapse Photography: A Complete Introduction to Shooting, Processing, and Rendering Time-lapse Movies with a DSLR Camera

They were remarkably successful in gaining support, eventually swaying Secretary of State for the Colonies Joseph Chamberlain into drafting the agreement that secured their territories against the encroachment of Rhodesia, leading indirectly to the independence of present-day Botswana.
Collecting and Using Classic SLRs

This classic sociological examination of art as collective action explores the cooperative network of suppliers, performers, dealers, critics, and consumers who—along with the artist—"produce" a work of art. Howard S. Becker looks at the conventions essential to this operation and, prospectively, at the extent to which art is shaped by this collective activity. The book is thoroughly illustrated and updated with a new dialogue between Becker and eminent French sociologist Alain Pessin about the extended social system in which art is created, and with a new preface in which the author talks about his own process in creating this influential work.

Written Word in the Medieval Arabic Lands: A Social and Cultural History of Reading Practices

By photographers for photographers, Magic Lantern Guides help you get the most from your gear. Written specifically for each individual model, these books don’t water down the hard-core information with general how-tos: they cover every feature and menu option in easy-to-follow language; unravel the mysteries of flash; and offer expert explanations of how to use a camera’s special functions. And now, they’re totally redesigned, in full colour and looking better than ever!

We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Prophetic Faith of Our Fathers

In the fall of 2016 an international scholarly conference accompanied the exhibition Beyond Words: Illuminated Manuscripts in Boston Collections. The speakers were chosen because of their expertise and because they were known to have research underway pertaining to important manuscripts in the exhibition. The aim of both exhibition and conference was to provide a broad overview of the history of patronage and book production over the course of the High and late Middle Ages, to the extent that the eclectic holdings of Boston-area institutions permitted. Most of the papers delivered at the conference have been collected as essays in this abundantly illustrated volume which, while still linked to the exhibition, now has an independent purpose. Just as the essays cover a wide range of topics, all relating to the history of the book, but also, inter alia, to the history of law, liturgy, literature, and libraries as well as to devotion, theology, and art, so too the approaches adopted by the contributors are as varied as the materials they study, ranging from paleography, codicology, and provenance research to painstaking reconstructions of historical patterns of patronage and the interpretative strategies of authors and artists. What results is not simply a wealth of fascinating insights into individual illuminated books, their makers, and their readers, but also an indication of how much remains to be learned about the materials to which the exhibition served as no more than an introduction.
